DETAILED ACTION

Drawings

This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Election/Restrictions

Newly submitted claims 15 and 16 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

- I. Claims 1, 2, and 5, drawn to a circuit board, classified in class 174, subclass 261.
- II. Claims 15 and 16, drawn to a method of making a circuit board, classified in class 29, subclass 830.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product of the invention of group I does not require the step of propagating on the bus the source synchronous clock signal.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 15 and 16 have been withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by US 3,568,129, granted to Gold et al. (hereafter Gold).

Gold discloses, a circuit board having tow side, the circuit board comprising: A substrate (10) having a first array of vias (corresponding to the screws 18 for the station 16a) to connect to a first agent (16a), the first array of vias defining a first set of channels on the substrate, and having a second array of vias (corresponding to the screws 18 for the station 16b), the second array of vias defining a second set of channels on the substrate; and a bus comprising bus traces (12), wherein each bus trace is routed in only one channel belonging to the first set of channels and routed in only one channel belonging to the second set of channels [claim 1], wherein the first and second agents are mounted upon only one of the two sides of the circuit board

Art Unit: 2827

[claim 2], wherein the first array of vias are arranged in substantially linear rows and the second array of vias are arranged in substantially linear rows [claim 5].

Response to Arguments

Applicant's arguments with respect to claims 1, 2, and 5 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeremy Norris whose telephone number is 703-306-5737. The examiner can normally be reached on Mon.-Th., 9AM - 6:30 PM and alt. Fri. 9AM-5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David L. Talbott can be reached on 703-305-9883.
